Index to Mechanical Engineering

Volume 46, January to December, 1924

D, denotes discussion; C, correspondence

A

Abbott, W. L. Coal-storage systems (D) ... 196
Aar, River ... 704
Adler, A. A. Coal-storage systems (D) ... 198
Organization and construction of woolen mills (D) ... 211
Admiralty, British ... 632
Advertising, references to industrial standards in ... 507
Aerial bombing ... 309
discussion on ... 542
Aerodynamic laboratory at Toronto University, formal opening of new ... 165
Aeronautical nomenclature, national conference on ... 924
propaganda, committee for ... 705
research committee ... 908
Aeronautics, Committee for, National Advisory ... 702
recent developments in ... 299
Air-blast heaters ... 350
-cleaner tests, California ... 635
compressed-, plant operation ... 417
-cooled radial engine ... 551
fuel-, ratio to engine performance ... 633
heaters ... 626
infiltration of, tests on, into buildings ... 419
-jet-propelled launches ... 901
law, Federal, the need for ... 226
liquefaction plants, power consumption in ... 582
mail test ... 648
meet, the Dayton ... 724
motions ... 420
pipe with, pressure drop in ... 549
preheated, boiler-test results with ... 64
preheating of ... 492
separator, Hickman ... 219
transport, power to ... 551
Aircraft carrier "Hermes" ... 281
large, engine for ... 633
motors ... 705
Airey, John. The present status and future problems of art of cutting metals (C) ... 160
Airless injection ... 899
Airplane, commercial possibilities of the airplane ... 133
communication, transcontinental, editorial ... 503
-engine designing ... 284
engine, stopping ... 94
landing and launching device, Gibbons ... 281
light-, flying clubs ... 631
light, see also Plane, light
man-propelled ... 43
paying load ... 551
pilotless ... 898
superchargers for ... 154
Airplanes of metal, production ... 733
Alcohol as source of power ... 551
Alden hydraulic laboratory ... 153
Aldis Bros. ... 493
Aldrich, W. H. Pulverized fuel at Cleveland Electric Illuminating Company's Lake Shore plant ... 519
Alexander, Wm. ... 712
Allen, Charles M. ... 152, 154
Allen, Charles M., and Taylor, Edwin A. Salt velocity method of water measurement ... 13
Alliott, E. A. ... 358
Allis-Chalmers Co. ... 630
Allison, Fred ... 904
Alloys, bearing, with low copper content ... 682
various aluminum, resistance of to salt-water corrosion ... 199
Allyn, S. C. Evaluating the cost department (D) ... 478
Aluminum alloys, various, resistance of to salt-water corrosion ... 199
-coated grate bars ... 902
die casting of ... 703
recent observations regarding the corrosion, cleansing, and protection of ... 206
American Association for the Advancement of Science, function of the ... 104
Cincinnati meeting of the ... 105
American Cast Iron Pipe Co. ... 488, 494
American engineering achievements to be shown at Olympia Exhibition ... 643
American Engineering Council Committee reports on Muscle Shoals situation ... 367
American Engineering Standards Committee developments ... 717
Year Book of for 1924 ... 506
American Locomotive Company ... 493
American Safety Museum, opening of the ... 166
American Society for Steel Treating ... 701
Ammonia, synthetic,—a new task for the engineer ... 721
vapor, superheated, specific heat of ... 50
Ammonium sulphate, cost and price of ... 419
Amsterdam, Municipal Psychotechnic Laboratory of ... 551
Analysis of a machine-shop problem on a quantity and final-economy basis ... 335
Anderson, David S ... 149
Anderson, Robt. J. ... 487, 553, 703
Corrosion of aluminum alloys (D) ... 203
Angle, Glenn D. ... 154, 633
Anglo process of galvanizing ... 48
Angus, R. W. Salt velocity method of water measurement (D) ... 51
Annual and Spring Meetings. *See* A.S.M.E.
Annual tables, international, and international critical tables ... 362
Anthracite, furnaces for burning small sizes of ... 138
region, steam-boiler practice in ... 48
Apparatus, condensing, test code for ... 291
Armstrong, A. H. Development of the electric locomotive ... 608
Recent developments in electric locomotives (D) ... 698
Armstrong, E. J. Machining massive parts of the world's largest prime movers ... 263
Art of cutting and forming metals, report on present status and future problems of ... 20
Ash-softening temperatures ... 703
A.S.M.E. Annual Meeting, forty-fourth ... 35
Aeronautic session ... 38
Business meeting ... 35
Coal-storage session ... 37
Education and training for the industries session ... 37
Entertainments and excursions at ... 36
Fluid Meters session ... 36
General session ... 36
Machine-shop practice session ... 38
Management session ... 38
Oil-engine session ... 38
Ordnance session ... 37
Power test codes public hearing at ... 37
Refrigerating Engineers, joint session with ... 36
Session on modern subway cars ... 37
Steam power session ... 37
Steam table research session ... 37
Student session ... 36
Textile session at ... 36
Water-measurement session ... 38
A.S.M.E. Annual Meeting, forty-fifth, 1924 ... 722
and Power Show, note on ... 503
new plan for distribution of papers at ... 648
papers, synopses of, not printed in the Mid-November issue ... 926
Program tentative ... 713
A.S.M.E. special research committee on metal springs, preliminary progress report of ... 793
A.S.M.E. Spring Meeting, Cleveland, Ohio ... 300
Aeronautics and Ordnance session ... 412
Boiler code committee meets with inspectors ... 416
Business meeting ... 411
Cleveland power session ... 412
Design session ... 414
Effect of temperature upon properties of metals session ... 414
Electric locomotive session ... 416
Hearings and committee meetings ... 416
Interchangeable manufacture session ... 416
Joint session with the American Society of Refrigerating Engineers ... 416
Machine-shop practice session ... 411
Materials handling in industrial plants session ... 411
Measurement of management session ... 412
Mercury-vapor process session ... 413
Power problems in the steel industry session ... 412
Sessions at ... 411
Windmill and fan design session ... 411
Assembly of automobiles, material-handling problems encountered in the ... 339
Atlas Aluminate Cement Co. ... 417
Atom, energy in: can man utilize it? ... 500
Auel, C. B. More engineering in salvage ... 642
Austria, power production in ... 550
"Autofrigor" refrigerator ... 908
Autogaz ... 902
Automobile-body plant, lumber handling in an ... 472
chassis ... 97
Diesel engine ... 285
testing at Mason Laboratory ... 711
transmission, variable, continuously, Weiss ... 287
Automobiles, material-handling problems encountered in the assembly of ... 339
Automotive Engineers, Society of, heat-treatment definitions submitted to the ... 435
Automotive industry, progress of the ... 104
Aviation from the standpoint of the War Department ... 931
in Canada, civil ... 643
Azbe, V. J. Water-cooling-system efficiency ... 799

hydraulic, propeller-type 704
hydraulic, Siebenbrunn 550
steam 552, 628
steam, automatic nozzle regulator for 425
steam, commercial efficiency 97
steam, specifications for, note on 927
Turner, Channing. Forces acting on ball-bearing and roller-bearing connecting rods (C) 297
Turner, J. A., Dr. 494
Turret lathe, plain-head, as chucking machine 217
Twelve-hour day in U. S. Mint 50

U

Uddeholm Tube Co. locomotive superheater 906
Uerdingen Car Shops buffer springs 221
U.E.S. report for 1923 166
Unfired pressure vessels, report on code for 916
Uniflow locomotives in Germany 637
United Light and Power Co. 50,000-kw. steam turbine 628
United States, steam generation in 626
U. S. Bureau of Standards, report on progress in steam research at 81
U. S. Mint, 12-hr. day in 50
U. S. Navy, fuel-oil burning in the 769
a repair shop for destroyers of the 173
Utensils, the thermal efficiency of gas-fired 719
Utilization of steam in the iron and steel industry, the generation and 325

V

Vacuum evaporator, inclined rapid-circulation-type, heat transmission in 349
refining process for oil 708
Vail, Carl W. Forces acting on ball-bearing and roller-bearing connecting rods (C) 363
Vallarta, M. S. Mathematical theory of dynamic stresses in rotating gear pinions (D) 587
Valve, stop-, design for superheated steam 550
tulip-shaped, of silochrome 284
Valves operating at high temperatures, material for 486
VanBrunt, John. Pulverized fuel (D) 522
Van Deventer, F. M. Steam in iron and steel industry (D) 501
Van Deventer, F. M., and Bannister, Bryant. Power organization in the steel industry 248
Van Dusen, M. S. 351
Van Marle, D. J. 350
Vapor, water, (steam), Mollier diagram for 712
Vareille, Godet-, diminutive "six" automobile 489
Ventilation in electrical machines, bibliography available on 439
Ver Planck, W. E. 280
Vessels, unfired pressure, report on code for 916
Vevey (Switzerland) Machine Co. propeller-type turbines 704
Vibration due to shaft whipping 279
recorder 424
Viscosity, internal, of metal 280
Viscous liquids, flow of, theory of 706
Vocational school, success in producing gears 50
Voltage curves in water-flow measurement test 153
Voss, E. 350

W

Wabash Railway, switching locomotives for 423
Wabash River mine-mouth plant of Indiana Electric Corporation 555
Wadleigh, W. H. 424
Wagner, R. T. 906
Waizenegger 702
Walker, Perley F. Coal-storage systems (D) 197
Walls, furnace, loss of heat from 351
Wanamaker, E. Recent developments in electric locomotives (D) 697
War construction engineers exonerated 163
department's preparedness program, some production problems in the 268
Discussion on 270
Ward, J. 424
Ward, J. T. 350
Warner, E. P. Commercial possibilities of the airplane (D) 137
The need for Federal air law 226
Portrait of 226
Wind power for farm electric plants (D) 681
Washington Award, 1924 Commission of, to Arthur N. Talbot 504
Waste material, salvaging, note on 865
wood-, prevention 929
Water-cooling-system efficiency 799
-flow measurement test, voltage curves in 153
flow of 492
-gas-generator fuel, bituminous coking coal as 151
heater 350
large volumes of, free discharge of 703
measurement, salt-velocity method of 13
-power costs versus steam-power costs 11
power in Canada 267
power in pulp and paper industry in Canada 491
power installation, miniature 152
simultaneous flow of, and air in pipes 421
treatment 707
treatment for continuous steam production 810
treatment, softening agent in 288
-vapor diagram 212
vapor (steam), Mollier diagram for 712
Waterbury oil transmission 493
Waters, E. O. Mathematical theory of dynamic stresses in rotating gear pinions (D) 587
Stress distribution in rotating gear pinions as determined by the photoelastic method 131
Watertown Arsenal, Watertown, Mass., X-ray examination of metals at the 773
Wave transmission of power 287
